

Education

Indian Institute of Information Technology Lucknow

Bachelor of Technology in Information Technology; CGPA: 8.65/10.0

Lucknow, India

August 2024 – June 2028

- Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Full-Stack Web Development, Software Engineering.
- Honors:** Reliance Foundation Scholar (**Top 5% of 100,000+ applicants**).

Experience

PayPal

Mentee – Career Academy Program

Remote

March 2026 – Aug 2026

- Selected from a highly competitive applicant pool for an **exclusive 6-month software engineering mentorship** program.
- Engaging in advanced technical upskilling under industry experts, focusing on **modern Software Engineering trends, system architecture**, and professional development.
- Participating in dedicated 1-on-1 sessions with senior PayPal engineers to refine **system architecture**, conduct rigorous **code reviews**, and align workflows with **enterprise coding standards**.

Technical Projects

DineSync – Enterprise Dining Management System 

| Java, Spring Boot, Spring Security, Thymeleaf, PostgreSQL

[Project Link](#) 

- Architected a scalable, full-stack MVC application** using **Spring Boot 3.4** and **Java 21**, applying **object-oriented design (OOD)** principles to build seamless product cataloging and real-time order tracking.
- Engineered robust authentication and authorization** utilizing **Spring Security** and **OAuth2**, enforcing role-based access control (RBAC) and securely hashing user passwords with **BCrypt**.
- Designed relational database schemas** with **Spring Data JPA**, containerized the application via **Docker**, and implemented comprehensive **unit testing and debugging** to ensure zero-defect cloud deployments.

Panthal – Real-Time Social Platform 

| Next.js, Node.js, Express, MongoDB, Socket.io

[Project Link](#) 

- Developed a scalable content sharing platform** merging video streaming and microblogging, utilizing **Next.js** to enforce modern front-end architecture best practices including **performance, accessibility, and usability**.
- Engineered a real-time chat architecture** utilizing **Socket.io**, supporting live dynamic rooms, presence indicators, and instant messaging with sub-second latency.
- Designed complex MongoDB aggregation pipelines** for efficient querying of highly relational data and integrated the **Gemini API** to power an intelligent platform chatbot.

STSMS – Smart Traffic & Street Safety System 

| Python, YOLO, OpenCV, Flask, LLM

[Project Link](#) 

- Built a YOLO-based real-time ambulance detection module** that dynamically adjusts traffic signals at intersections, holding non-emergency vehicles to clear a path for emergency response.
- Developed an LLM-powered incident classification pipeline** (accidents, threats, harassment) integrated via **Flask REST API**, alongside an **OpenCV face recognition** module for real-time matching against a wanted persons database.

Honors and Achievements

- Amazon ML Summer School Scholar:** Selected out of **1,30,000+ applicants nationwide** for Amazon’s competitive Machine Learning training program, mentored directly by Amazon Applied Scientists.
- Shubhra Kar Linux Foundation LiFT Scholar:** One of **500 recipients selected globally** for the Linux Foundation’s LiFT Scholarship, awarding fully-funded **open-source** training.
- Competitive Programming:** Rated **Expert (1708)** on Codeforces, **4-Star (1827)** on CodeChef, and **Knight (1873)** on LeetCode. Solved **1000+ algorithmic problems** across **90+ contests**. [Codeforces](#) [LeetCode](#)
- Global Top Contest Ranks:** Secured **Global Rank 42** (Div. 2) and **Rank 46** (Div. 3) on CodeChef, alongside **Global Rank 410** (Div. 2) and **Global Rank 1240** (Div. 1 + Div. 2) on Codeforces.
- Hackathon Achievements:** **Winner (1st Place)** at Hack-o-Fiesta v6.1 (IIIT Lucknow’s flagship 24-hour global AI/Web3 hackathon) and **Top 21 Global Finalist** at the Rootstock AI BUIDL Hackathon.
- Mathematics & Coding Excellence:** Placed in the **Top 1% National Talent Pool** (88,000+ candidates) for the **IOQM** and Ranked in the **Top 1,500 nationwide** for the **Google Big Code Challenge**.

Technical Skills

Languages: C++, Java, JavaScript, Python, HTML/CSS, SQL, Solidity

Web & Backend: Spring Boot, React.js, Next.js, Node.js, Express.js, Flask, RESTful APIs

Databases & DevOps: PostgreSQL, MongoDB, Docker, Git/GitHub Actions, Linux

Core Fundamentals: Object-Oriented Design (OOD), Data Structures & Algorithms, DBMS, OS

Leadership & Collaboration

E-Cell IIIT Lucknow

Coordinator

June 2026 – Present

- Coordinated Annual Startup Expo (**500+ attendees, 20+ sponsors**); collaborated with cross-functional teams and managed corporate outreach.
